Digital Radiography System

GXR-SD Digital Radiography System

High Performance and Reliability

Optimal DR System

The GXR-SD Series is a digital diagnostic radiography system that provides high quality digital radiographic images with a reduced dose.

The GXR-SD DR systems offer comprehensive digital solutions to all radiography needs, featuring ACQUIDR digital imaging system with stationary or portable digital flat-panel detectors as well as reliable high-frequency X-ray generators that are known worldwide for their excellent performance, durability, and stability. Various tube stands, patient tables, and wall stands are available upon the user's request.

The GXR-SD Series DR system is guaranteed to improve your workflow, exam throughput, and efficiency with its excellent performance.

TS-FM6

Floor Mount Type Tube Stand

Floor Rail type tube stand provides smooth movement on the rail.

WBS

Wall Bucky Stand

Elegant design, durable and easy-to-use Wall Bucky Stand.

TS-FC6

Floor Ceiling Rail Type Tube Stand

Versatile fixed ceiling with slim rail design for smoother movement.

PBT-4

4 way Tabletop Patient Table

Large tabletop with extended travel enables all radiography studies with minimal patient movement. Fully flat tabletop without a frame on the edge makes cleanliness and odors free.

Full Featured Imaging Software & Excellent Digital Image Processing

DRGEM's high-performing imaging workstation and software system offers a convenient interface and easy operation for users. Anatomical view-based digital image processing automatically optimizes and enhances the quality of the captured images, while the automatic image storage and printing with DICOM 3.0 networking capability increases exam throughput and decreases examination time.

- Provides convenient user interface and easy operation.
- Anatomical view-based digital image processing automatically optimizes and enhances the quality of the captured image for the pictured anatomy.
- Radiographic stand & automatic collimator control function.
- DICOM 3.0 networking interface includes Worklist, Print, Store, Query for integration with any PACS or RIS.

Automatic Stitching

GXR-SD system provides outstanding automatic stitching function with Source tilting method.
